Education Background

- Singapore Management University
School of Computing & Information Systems
Bachelor of Science, Information System
Major (SMT/FinTech)
Aug 2023 - Present
- Temasek Polytechnic, School of Engineering
Diploma in Computer Engineering (Merit)
CGPA 3.87 out of 4
Apr 2018 - Apr 2021
- East View Secondary School
Jan 2013 - Nov 2017

Technical skills

- **Programming:** Python, Java, JavaScript, C, PHP
- **Web & Databases:** HTML, CSS, MySQL
- **Backend & APIs:** REST APIs, Microservices
- **Hardware:** Circuit Patching, Soldering
- **Tools & concept:**
 - Data Analytics
 - Prototyping
 - Microcontrollers Programming
 - Digital Transformation

Soft Skill

- Team-Player, Leadership
- Root Cause Problem Solving
- Adaptability

Involved Projects

Office Work Scheduler - OptiPlan

Aug 2025 - Dec 2025

- **Designed and delivered** a client-driven office scheduling web application using Scrum to support staff daily task planning
- **Translated** business requirements into user stories with clear acceptance criteria
- **Supported** sprint planning, estimation and backlog refinement to ensure timely delivery
- **Developed** comprehensive test cases to ensure system reliability and quality

Feast Finder - Microservices-based F&B Platform

Jan 2025 - Apr 2025

- **Designed and developed** a microservices-based backend using atomic and composite services to support core F&B workflows
- **Translated** business requirements into backend services using microservice design principles to ensure scalability and resilience
- **Built** RESTful APIs and orchestrated composite services to handle reservation, cancellation and notification taskings

Technologies used: Python, REST APIs, RabbitMQ, Docker, Twilio, Stripe

LABarber Digital Transformation

Jan 2025 - Apr 2025

- **Conducted** research and root cause analysis to identify operational inefficiencies and service gaps
- **Translated** findings into **digital solution proposals** to improve branding, and customer experience
- **Designed** low/high fidelity prototypes that supports long term digital growth to stakeholders

Project ADORE!

Aug 2024 - Dec 2024

- **Developed** a full-stack web application using modern Javascript framework and backend services to support community-driven stray adoption
- **Designed** a Reddit-inspired community forum to allow users to share updates and coordinate adoption efforts
- **Implemented** location-based features and notification capabilities to improve information sharing and response time

Web Dev Framework: Vue/Nuxt, Node.js, Express.js

Quek Kang Sheng

Involved Projects

Process Innovation Plan for BTO Application Process

Aug 2024 – Dec 2024

Key responsibilities:

- **Analyzed** the existing BTO application workflow to identify process bottlenecks and inefficiencies
- **Developed** structured recommendations through root cause and impact analysis to support process redesign
- **Modelled** current and future-state processes using Signavio to enable better visual understanding
- **Presented** findings and recommendations to stakeholders

Sustain Wardrobe

Aug 2024 – Dec 2024

- **Applied** user-centered design methodologies to research and iteratively prototype a sustainability-focused mobile app
- **Designed** high-fidelity UI/UX prototypes to improve usability and user engagement
- **Defined** user interaction flows and application logic to support scalable feature implementation
- **Collaborated** with team members to align user research insights with product and technical decisions

Technologies: Figma

Temasek Poly Major Project – Fine Motor Skills Training

Apr 2020 – Apr 2021

- **Developed** an integrated hardware-software solution to support fine motor skills training for autistic children
- **Engineered** smart gloves with flex sensors to capture and process finger movement data
- **Designed** a sensor-integrated mobile game to increase engagement while collecting performance data
- **Built** a web-based analytic dashboard to visualize performance metrics and identify trends
- **Collaborated** with stakeholders and domain experts to iteratively refine the solution, with the aim of scaling it for long-term healthcare use

Professional Experience

Ma Maison Restaurant, Service Crew

May 2025 – Aug 2025

- **Delivered** efficient customer service in a fast-paced environment while handling concurrent tasks
- **Coordinated** with team members to ensure smooth operations during peak hours

Ministry of Manpower, Intern Software Engineer

Sep 2020 – Feb 2021

- **Collaborated** with stakeholders to gather requirements and propose IT solutions aligned with business needs
- **Supported** the design and development of internal systems, application and digital workflows
- **Participated** in Agile/Scrum based development cycles
- **Supported** post-development activities by preparing technical documentation and system handover materials to enable maintainability and future scaling
